INFORMATION DISCLOSURE STATEMENT

Commissioner For Patents
Washington, D.C. 20231

Dear Sir:

Pursuant to 37 C.F.R. §1.97, the art identified on the attached form(s)
PTO/SB/08A and other matters discussed below may be helpful to the Patent Office in
its examination of the application identified above.

A copy of each of the documents is enclosed herewith for the Examiner's
consideration.

RELATED CO-PENDING APPLICATION

In accordance with 37 C.F.R. §1.97 and §1.98 and MPEP 2001.06(b), attention is
directed to the following co-pending commonly assigned application as being of potential
interest in the examination of the subject application:

<u>Serial No.</u>	<u>Filing Date</u>
10/678,942	October 3, 2003

Application Serial No. 10/678,942 is a continuation of application Serial No.
10/115,188, now U.S. Patent No. 6,688,501, a copy of which is enclosed.

COMMENTS ON CITATIONS

The following comments are directed to the documents disclosed in the accompanying form PTO-/SB/08A. Non-English language documents without translation are discussed with a concise explanation pursuant to 37 C.F.R. §1.98(a)(3)(i).

FR 27 90454 was published on September 8, 2000 from an application No. FR 99 02670 filed March 2, 1999. The subject matter of the French document appears to be disclosed generally in the two French trade advertisement sheets "BOUCHON à TARTINER ou à ÉTALER--BEC VERSEUR--" and "BOUCHON à TARTINER ou à ÉTALER--NOUVEAU BEC VERSEUR--." An employee of a European company which is a wholly subsidiary of a company that wholly owns the assignee of the above-captioned instant U.S. patent application first became aware of the trade advertisement sheets in March 1999 in France and understands the company which distributed the advertising sheets, Aquila, to be a small European company that does not export to the U.S. These documents disclose a rigid plastic spout defining a fixed shape, elongate, dispensing aperture.

FR 1 135 210 appears to disclose various embodiments of a dispensing system which includes various forms of a valve having slits which apparently open to discharge product when the product is pressurized on the inside of the valve. FIGS. 9, 10, and 11 appear to show an elongate, triangular configuration with a single slit. FIG. 7 shows a slit 19 in a structure, which, in cross section, has a triangular shape. FIG. 7 could be a conical design, but without an English language translation, the below-identified attorney is unable to be certain. Other embodiments, such as shown in FIGS. 2, 3, and 5, have multiple slits. FIGS. 1 and 6 show dome-shaped configurations.

Serial No. Not Yet Designated - - - 3

DE 1 250 225 appears to disclose, in FIG. 1, a valve having a single elongate slit and a rectangular member. FIGS. 4-9 illustrated single slits, but the overall plan view configuration is not illustrated and is not necessarily clear.

The order of listing of the art on the attached Form PTO/SB/08A should not be construed as an indication of the importance of the listed art.

The Patent and Trademark Office Examiner is requested to review the art and determine the extent of the materiality of the disclosures thereof with respect to the patentability of the subject invention. It is expected that the Patent and Trademark Office Examiner will independently conduct a complete search for relevant prior art.

No inference should be drawn and no representation is made or intended: (a) that a search has been made, or if made, was complete; (b) that the art on the attached list presents a comprehensive investigation of the prior art; or (c) that art no more pertinent than that listed is in existence.. [See 37 C.F.R. §1.97(g)]

Citation of any art herein is not to be construed as an admission: (a) that the art disclosure is, or is considered to be, necessarily within the invention field of endeavor, pertinent to the instant invention, or equivalent to the instant invention; (b) that the art disclosure is, or is considered to be, necessarily prior in time to a particular date which may be relevant in the instant patent application; (c) that the art disclosure is, or is considered to be, material to patentability as defined in 37 C.F.R. §1.56(b); (d) that the art disclosure is otherwise necessarily prior art with respect to the instant invention and application; and/or (e) that the information, protocols, results and the like reported by third parties are accurate or enabling. [See 37 C.F.R. §1.97(g).]

Serial No. Not Yet Designated - - - 4

No inference should be drawn that the discussion of any art herein is a discussion of each and every feature disclosed therein.

Also, there is reserved the right to later set forth how the instant invention is distinguished over the disclosures of any document or other art, including the disclosures of the art cited herein, that may be cited by the Examiner in rejecting a claim in the instant patent application.

Respectfully submitted,

Dated: March 26, 2004
